

Ethical Reasoning

Chapter Priorities

Fraternity life can make many contributions to the quality of campus life, and our organization serves many purposes. Rank, in your opinion, each of the purposes/contributions listed below in the order that reflects the importance of that purpose (1 being most important). After you have done this individually, you will have 20 minutes to join with 5-6 other brothers and to reach consensus on a group ranking for each of the purposes. Consensus implies that everyone in the group supports, or at least does not completely disagree with, the group's ranking decisions

Once your group has reached consensus, you must determine how you will present (and justify) your decisions to the rest of the chapter
